Linux is the number one operating system in the corporate world. It is a popular open-source operating system that is easy to use and highly secure. If you want to start your career in Linux and have little or no knowledge of Linux, then this course is for you.

In this course, you will master Linux installation, configuration, administration, troubleshooting, the command line, OS tools, and much more. We have included resume and interview workshops that will help you get your dream IT job. This course will also help significantly in passing your RHCSA, RHCE, LFCS, and CompTIA Linux+ certification exams.

By the end of this course, you will be a professional Linux administrator, be able to apply for Linux jobs and to take the EX-200 exam, and become a Redhat Certified System Administrator (RHCSA - EX200).

What You Will Learn

- Learn 150+ Linux system administration commands
- Use CentOS and Redhat version 7 and 8
- Understand Linux fundamentals and concepts
- Troubleshoot Linux-related issues
- Manage Linux servers in a corporate environment
- Learn to write basic-to-advanced-level shell scripts

Audience

This course is designed for people who want to start a career in Linux, those who want to become a RedHat Certified System Administrator (RHCSA EX-200), and anyone keen to master Linux command-line skills.

About The Author

Imran Afzal: Imran Afzal is a systems engineer/manager, entrepreneur, instructor, and a public speaker. He started his career with Time Warner in 2000 as a systems administrator. He was involved in deploying technologies such as DTV, VOD, CableCards, and others. These technologies were built on many Linux distributions. Since then, he has utilized Linux/Unix skills in many Fortune 500 companies.

He has worn many different hats and currently manages a large team of systems engineers, administrators and team leads globally. He has spearheaded projects such as datacenter migration, introduction, and deployment of VMware, monitoring tools implementation, Amazon cloud migration, and many more. He is certified in Linux Systems Management, UNIX Operating Systems, Linux System Administration, System Internals, VMWare Certified Professional, RHCSA, and Windows Server Certified.

About the Publisher

Packt helps real-world developers put software to work in new ways with over 7,500 practical books and videos covering over 1,000 technologies. With coverage ranging from introductory programming to new and emerging technologies, as well as expert advice from industry-leading figures, Packt has great content for any technical professional looking to stay relevant and keep their skills up-to-date.
