Practical Python 3

★★★★★ [6 reviews](#)

By **Edouard Renard**

TIME TO COMPLETE:
3h 49m

TOPICS:
Python

PUBLISHED BY:
Manning Publications

PUBLICATION DATE:
August 2022

Start

This course teaches you the Python basics—nothing more, nothing less. Taking the time to explain the basics gives you the foundation you need to start any project or learning path and career.

To be clear, this course is not an all-in-one, 60-hour course with 45 projects that's going to take you 6 months to complete. I'm not saying those courses are bad; I'm taking a different approach to focus on just the basics.

At the end of this course, and this is important, you will have a strong foundation in Python basics. You will be able to build on that foundation with confidence.

About the Publisher

Manning is an independent publisher, providing computer books for software developers, engineers, architects, system administrators, and managers. Our books also cover topics for young programmers, students, and occasionally children.
